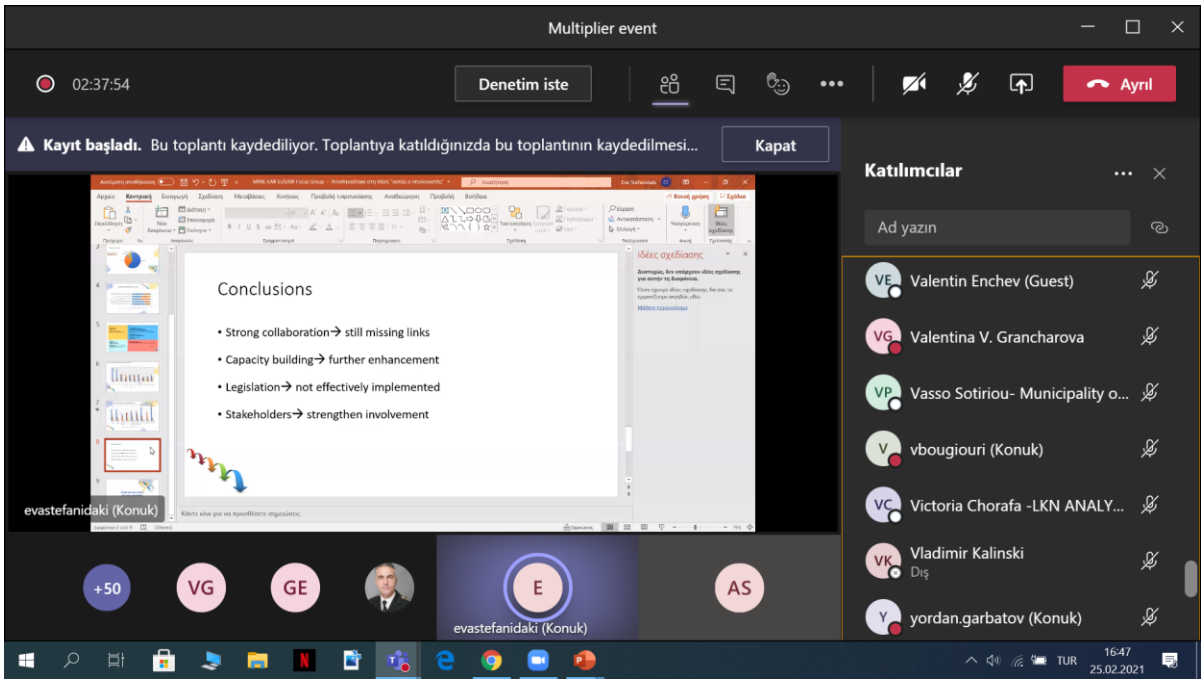
PRESS RELASE No: 4

THE 3RD "TRANSNATIONAL PROJECT MEETING AND INTERNATIONAL STAKEHOLDER 'S CONFERENCE" OF THE MINE-EMI PROJECT ACCOMPLISHED

In accordance with the MINE-EMI Strategic Partnership and Cooperation Project program within the scope of the EU Erasmus + Strategic Partnership Program, the third of the "Transnational Project Meeting and International Stakeholders Conference" carried out in a virtual environment on February 25, 2021, with the arrangement of the Nicolo Vaptsarov Naval Academy, one of the project partners.

Representatives of the universities and organizations involved in the project and their officials, as well as the representatives of maritime companies and organizations and graduate students attended the conference. In the conference, which had more than 60 participants, information was given about the phases of the project carried out so far, the scientific studies on new developments in the field of maritime were presented by the academicians from the universities involved in the project, and the opinions of representatives and graduate students from different fields of the maritime sector were received.



The MINE-EMI Project aims to develop a master's program to educate the candidates of managerial positions of maritime institutions and companies. The program targets to bridge the gap between the needs of the maritime sector and the existing education programs, and

it is planned to be simulation-based. The project consists of preparation, development, testing and finalization phases. At the conference, information was given about the purpose and current situation of the project in the first session, and the scientific studies of the project members on some of the topics considered to be included in the Master's Program were presented in the second session. The final session separated for receiving the opinions and evaluations of the sector representatives and graduate students. The opinions and evaluations received from the participants will be taken into consideration in the development of the Master Program and the program will be tested with the student mobilities. The first mobility event planned in June 2021.

Detailed information about the project can be found at the addresses below.
