

MENTORing FOR THE SEA – READY, STEADY, SAIL AHEAD!

While the beginning of 2018 was marked by the establishment of the secretariat of the Blue Career Centre (BCC) of the Eastern Mediterranean & Black Sea in Cyprus, the autumn was welcomed with the foundation of the Blue Career Centers in Bulgaria and Romania. The local training points are part of the international facility promoting and reinforcing the study, education, professional progress, research and innovation in the sectors of the Blue Economy such as maritime transport, cruise tourism, marine aquaculture, and offshore oil and gas.

October also proved to be an eventful month, hosting the second MENTOR consortium meeting kindly held at the premises of the Constanta Maritime University (CMU) in Romania. The hospitality of the hosts and the superb meeting arrangements were complemented by a tour to the labs and simulator rooms of CMU.

Visit to the Engine Simulator Room (CMU)

In addition, the second Blue Career Fair in Romania followed the Consortium meeting on October 19, where local business representatives presented numerous career opportunities to students, guests and interested parties. Ten Bulgarian students also visited this event and had the opportunity to get familiar with the available training

facilities and qualification simulators. The mobility of the project staff and students allowed for their active participation in the career fair.

The Career Fair in CMU premises on 19th October 2018

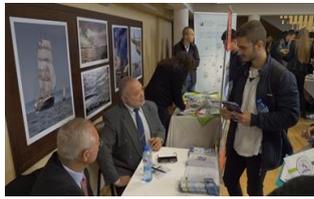

On November 15, Marine Cluster Bulgaria organized the second Blue Career Fair in Varna, Bulgaria. The event gathered more than 250 participants - students from high schools and universities, representatives of educational institutions and business, Professionals of maritime sectors presented to the audience career opportunities in various blue sectors. In the afternoon a matchmaking session allowed the students to get additional information from companies, training centers and recruiting agencies.
